

STENCIL

Stencil Instructions:

- 1) Cut out all areas marked with an "x". Take your time, don't cut off any fingers you'll need them for step two and three.
- 2) Flatten the stencil and tape down its edges.
- 3) Spray paint. Shake well, then spray. Let dry. Repeat as necessary.

Slim Jim and the Fairy Snapmother do not suggest that cutting your finger off is funny, or that spray-painting anything you don't own is a good idea, because they don't allow Slim Jims in prison.
