You'll get your first taste of snow racing in the Star Cup. You might be longing for warmer climates until you spot the giant Piranha Plants lurking in the Yoshi Desert. Good luck!

Snow Land

When you have to be picked up by Lakitu, you can get a boost if you press the gas button at exactly the right time. Listen to your engine and try to time it so that your wheels hit the ground right before your RPMs max out. If hold the button too long, you'll spin out.

Ribbon Road

When you come to the first set of boost pads, you can skip a large portion of the track by jumping to the right instead of aiming straight ahead. If you don't hit both boost pads, though, you're out of luck.

Yoshi Desert

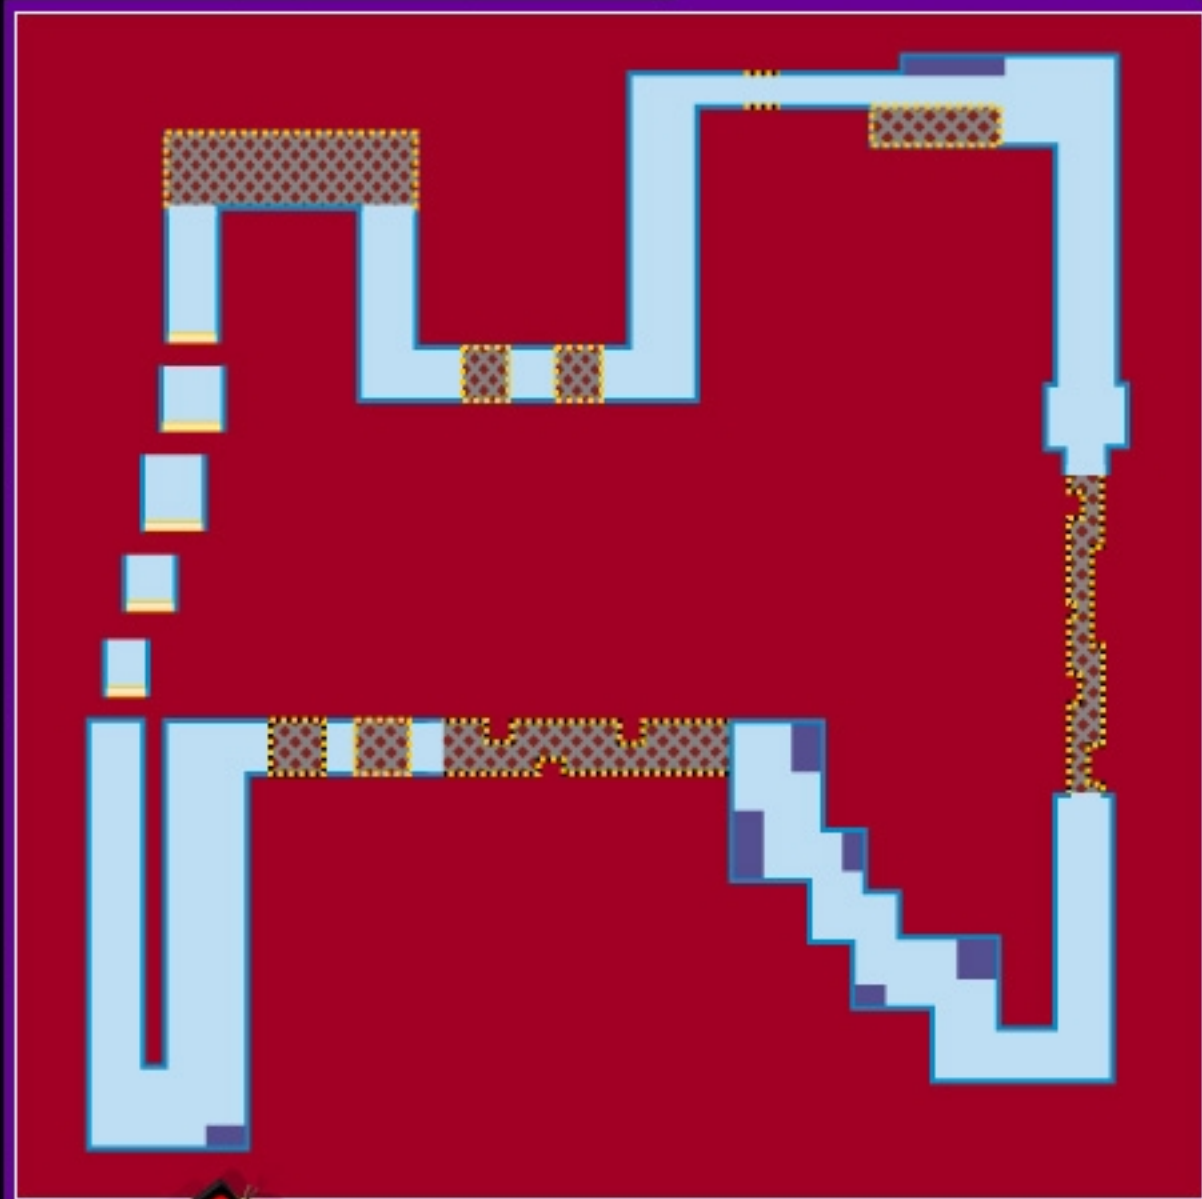

Stay on the track in Yoshi's Desert. There are dangerous pits of quicksand lurking just off the beaten trail.

Bowser Castle 3

Pay close attention to the edge of the track. If the track is bordered by yellow and black stripes, you'll know that there is no safety rail to protect you from the lava.
